Several tank soldiers and nine tanks were observed in the kaserne area of the LUDWIGSLUST - TECHENTIN (M 54/T 52) airfield. The landing field had been reconditioned. German civilian workers were apparently constructing earthbunkers on the edge of the field, which was heavily guarded. The kasernes were surrounded by a high board fence.

 Comment:

The occupation of the field kasernes by a tank unit has been regularly reported The information on the completed reconditioning work on the landing field is considered credible since, according to another report, construction workers were drafted for this field The field has, so far, not been occupied by an air unit. 25X1
